RC Catamaran: What to Buy

Mini Cat, 1 m boat and foiling kit

Filip Maleev

Prices read on retailer pages 23–25 September 2026, re-checked 4 October 2026

The plan

Build in three stages, each after the one before sails well. The build manuals (`mini/manual/` and `manual_1m/`) say what each part is for and how it goes together.

	List price	To buy, in this order
Stage 1: Mini Cat 600	$248.26	$248.26
Stage 2: 1 m boat (daggerboards)	$397.74	$302.77†
Stage 3: foiling kit	$101.17	$101.17
All three		**$652.20**

† The radio, its AA cells and the NiMH pack bought for the Mini ($94.97) move to the 1 m boat. Leftover filament, epoxy, glue, sail cloth and line from one stage may cover part of the next; the lists assume new stock.

Prices exclude shipping and tax. They were read on the retailers' pages in September and re-checked on 4 October 2026; the two that could not be re-checked say so. Check them before ordering. Under each item, in italics, is the listing the price came from, with the part number where there is one and a note where the price is uncertain.

Also needed, not priced above

- **A 3D printer** that prints PETG, with a bed of at least 220 x 220 mm. Every part is sized for that bed; two print diagonally (the 1 m manual says which).
- **A NiMH charger** for the eneloop AA cells. The Panasonic charger bundled with 4 more eneloop cells was $32.09 at Walmart on 24 September 2026 [24] but out of stock on 4 October.
- **Hand tools**, assumed on hand: hobby knife and steel rule; drill bits 1.2, 1.5, 2, 2.5 and 3.2 mm (a pin vise is enough); side cutters and round-nose pliers for the music wire; 240-grit sandpaper; masking tape; a fine-tip soldering iron or hot needle for holes in the sailcloth; small screwdrivers; a 0.9 mm hex key for the elevator trim screws; a bucket or sink for leak tests; a kitchen scale.
- Servo screws come with the servos.

Choices: recommended parts and their alternatives

Where a part has a cheaper or better option, the lists use the recommended one (marked * in the lists). Swapping to the alternative changes the totals by the difference in price.

FlySky FS-i6X + FS-iA6B receiver (mini/1 m)

Option	Unit	Pros	Cons
Recommended (listed): FlySky FS-i6X + FS-iA6B receiver HobbyTown [1]	$69.99	6 channels, so one radio runs both boats; the throttle stick stays where you leave it, which holds a sail trim	$31 more than the car radio
Cheaper, Mini only: FlySky FS-GT2E + FS-A3 (car radio) HobbyTown [2]	$38.99	$31 less	2 channels, so it cannot run the 1 m boat (you would buy the FS-i6X later as well); the throttle trigger springs back to centre, so a sail trim has to be held by hand

MG90S metal-gear micro servo (mini/1 m)

Option	Unit	Pros	Cons
Recommended (listed): MG90S metal-gear micro servo Waveshare [4]	$2.59	$2.59; the printed servo rails are drawn to its case	not waterproof; on the 1 m boat it sits under a printed cover aft of the rear beam, where spray reaches
Upgrade: EcoPower 640T waterproof micro servo HobbyTown [25]	$29.99	waterproof to 1 m and metal-geared (maker); rated 4.8-6.0 V, so it runs on the 4.8 V pack	$27.40 more; its case is 23.5 x 12.5 mm against the MG90S 22.8 x 12.2 mm, so it does not fit between the printed rails (23.4 mm gap) unless they are widened

Panasonic eneloop AA 2000 mAh, 4-pack (mini/1 m)

Option	Unit	Pros	Cons
Recommended (listed): Panasonic eneloop AA 2000 mAh, 4-pack Walmart [5]	$17.99	in stock when checked (2026-10-04)	$5.24 more; sold by a third-party seller on Walmart
Cheaper: The same eneloop 4-pack at MicroBattery MicroBattery [26]	$12.75	$5.24 less	out of stock when checked (2026-10-04)

Carbon tube 16 x 14 mm x 1 m (1 m)

Option	Unit	Pros	Cons
Recommended (listed): Carbon tube 16 x 14 mm x 1 m RMRC [18]	$27.46	price and stock confirmed on the page (2026-10-04); same store as the 12 x 10 mm mast tubes, so one order	$22.36 more for the two tubes

Cheaper: 16 x 14 mm carbon tube at Wind Catcher RC Wind Catcher RC [27]	$16.28	$11.18 less per tube	price from a search listing; the site blocked this connection, so price, stock and wall thickness are not confirmed; a separate order and shipping

BSI 30-minute epoxy 4.5 oz (mini)

Option	Unit	Pros	Cons
Recommended (listed): BSI 30-minute epoxy 4.5 oz HobbyTown [15]	$13.99	the strongest of the BSI epoxies, waterproof and more heat resistant (maker); 30 minutes to line up hull segments and beams before it sets	handle after 8 hours, full strength in 24 hours (maker)
Same price, faster: BSI 5-minute epoxy 4.5 oz HobbyTown [28]	$13.99	sets in minutes: handy for small fittings	weaker, and 5 minutes is short for lining up a long hull or beam joint

BSI 30-minute epoxy 9 oz (1 m)

Option	Unit	Pros	Cons
Recommended (listed): BSI 30-minute epoxy 9 oz HobbyTown [20]	$22.99	the strongest of the BSI epoxies, waterproof and more heat resistant (maker); 30 minutes to line up hull segments and beams before it sets	handle after 8 hours, full strength in 24 hours (maker)
Same price, faster: BSI 5-minute epoxy 9 oz HobbyTown [29]	$22.99	sets in minutes: handy for small fittings	weaker, and 5 minutes is short for lining up a long hull or beam joint
